Flagship work

AI Navigation Glasses. Research prototype, not a certified mobility aid, and not a replacement for a cane, guide dog, traffic rules, or the user's judgment. Earlier program: 3 communities, documented in private records. Current safety prototype: 13 automated tests; event history keeps 0 raw video, audio, or location fields. Bosch traffic-light check: 215 labeled frames, committed-decision coverage 6.6%, including 1 red read as green, published unedited. The shell and the guidance demo are not an integrated wearable product.

EPSILON. The public demo is a deterministic synthetic interface, not historical validation and not a performance claim. Case 001, the author's own strategy, was rejected by its own rules: baseline -7.75%, stress variants passed 0/5. Independent replications: 0.

GERT. The candidate forecast missed its calibration gate and was not promoted. Interval-coverage figures in the field note are an ongoing manuscript, not a published paper or an operational forecast.

Grid data. 65,711 hours of continuous grid data. August 2026 snapshot, retained as published.

Open source

24 merged upstream engineering pull requests across 16 repositories, verified November 5, 2026 (Pacific time). Own-project pull requests are excluded. The awesome-quant directory listing (#735, merged 2026-10-19) is counted separately and is not part of the 24.

Mathematical practice

Math StackExchange, August 2026 snapshot: reputation 978, 22 answers, 11 accepted, answer-score sum 37. The "3k" figure is Stack Exchange's estimated reach, not a count of unique readers.

Competitions and honors

As printed on dresdengoehner.com, with the denominator beside the result.

- BMO Round 2 2026: 27/40, Distinction, Best in School
- USAJMO: Qualifier; supporting record retained privately
- AIME 2026: 14/15, Qualified, Certificate of Excellence
- Stanford Mathematics Tournament, Algebra 2026: 3rd place
- Stanford Mathematics Tournament, Discrete 2026: 7th place
- BPhO Round 1, 2025-26: 80/100, Global Top Gold, Beijing rank 5, Best in School
- SMC 2025: 120/125, Gold
- LSE Economics Challenge 2025: 97/100, one question missed, Top Gold
- World Scholar's Cup, Beijing 2025: Overall Champion Scholar, 1st Total, 3rd Place Senior Team, Global Qualifier
- ACSL 2025-26, Senior Division: Written 6/6, Program 6/6, Total 12/12
- NYT Learning Network, My List Contest 2025-26: Top 25%, 970 of 4,004 entries

Also on the public index

Polymath Society: leadership record, evidence on file. Energy Innovation: data-strategy internship, evidence on file. No additional counts are claimed here.

Every figure on this page already appears on dresdengoehner.com or at dresdengoehner.com/proof.html. Star counts are not claimed. If this page and the claim index disagree, the claim index is right.
